

App\Http\Controllers  
\MercadoriaController\store

App\Http\Controllers  
\MercadoriaController  
\update

App\Models\MercadoriaAgrupada  
\StoreAndUpdateAgrupamento

```
graph LR; A["App\Http\Controllers\\MercadoriaController\\store"] --> C["App\\Models\\MercadoriaAgrupada\\StoreAndUpdateAgrupamento"]; B["App\\Http\\Controllers\\MercadoriaController\\update"] --> C;
```

The diagram illustrates a dependency or data flow. On the left, two separate boxes represent controller methods: 'App\\Http\\Controllers\\MercadoriaController\\store' and 'App\\Http\\Controllers\\MercadoriaController\\update'. On the right, a single box represents a model method: 'App\\Models\\MercadoriaAgrupada\\StoreAndUpdateAgrupamento'. Two blue arrows originate from the right side of the controller boxes and point towards the left side of the model box, indicating that both controller methods interact with or utilize the model's 'StoreAndUpdateAgrupamento' method.
