

App\Http\Controllers
\Controller

```
graph BT; A["App\Http\Controllers\\Controller"] --> B["App\Http\Controllers\\ContaCorrenteController"]
```

The diagram illustrates a class inheritance relationship. At the top is a white box representing the base class 'App\Http\Controllers\\Controller'. Below it is a grey box representing the derived class 'App\Http\Controllers\\ContaCorrenteController'. A blue arrow points upwards from the derived class to the base class, indicating that 'ContaCorrenteController' inherits from 'Controller'.
