

App\Http\Controllers
\Controller

```
graph BT; ExportadorController[App\Http\Controllers\ExportadorController] --> Controller[App\Http\Controllers\Controller];
```

The diagram illustrates a class inheritance relationship. At the bottom is a gray box representing the 'ExportadorController' class, with the full path 'App\Http\Controllers\ExportadorController'. A blue arrow points upwards from this box to a white box at the top, which represents the 'Controller' class, also with the full path 'App\Http\Controllers\Controller'. This indicates that 'ExportadorController' inherits from 'Controller'.
