

App\Http\Controllers
\Controller

```
graph BT; A["App\Http\Controllers\\ProductExemptionReasonController"] --> B["App\Http\Controllers\\Controller"]
```

The diagram illustrates a class inheritance relationship. At the bottom is a gray-shaded box representing the base class, 'App\Http\Controllers\\ProductExemptionReasonController'. A blue arrow points vertically upwards from this box to a white box above it, representing the derived class, 'App\Http\Controllers\\Controller'.

App\Http\Controllers
